## DETAILED ACTION

### Allowable Subject Matter

Claims 1 - 9 are allowed.

The following is an examiner's statement of reasons for allowance:

With regards to claim 1, 4 and 5, the prior art on record does not suggest or render obvious a beam greater in thickness than the entire infrared detecting portion in a direction perpendicular to the surface of the infrared detecting portion, in combination with the rest of the claim limitations. As such applicants' disclosure provides a novel and nonobvious improvement over the prior art. Accordingly, claims 2 and 3 are also allowed since they further limit claim 1.

With regards to claim 6, the prior art on record does not teach or render obvious a method of producing a thermal infrared detector comprising a step of forming an etch stopper metal thin film on the fifth dielectric protective film of the infrared detecting portion except on an area to become an end portion of a shield wherein the shield is separated by a gap from the beam on an infrared incident side and later etching and soon after removing the etch stopper metal thin film to expose the fifth dielectric protective film, in combination with the rest of the claim limitations. As such applicants' disclosure provides a novel and nonobvious improvement over the prior art.

Claims 7 and 8 are allowable base on their dependencies.

With regards to claim 9, the examiner directs attention to applicant's remarks filed 9/16/2006 (See page 14).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

**Response to Arguments**

Applicant's arguments, see Remarks, filed 09/16/2006, with respect to claims 1-9 have been fully considered and are persuasive. The rejections of claims 1-5 and 9 have been withdrawn.

**Response to Amendment**

The amendment filed 09/15/2006 was entered.

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
